

NIST_CSF_Mapping_Summary

GreenLeaf Risk ID	ISO 27001:2022 Control	NIST CSF 2.0 Function	NIST CSF 2.0 Category	Why It Maps Here
GR-001	A.8.5 Secure Authentication	Protect (PR)	PR.AA-01 (Identity & Access Management)	MFA is a "Protect" control that verifies user identities before granting access.
GR-002	A.5.16 Identity Management	Protect (PR)	PR.AA-01 (Identity & Access Management)	Revoking access promptly "Protects" the system from disgruntled ex-employees.
GR-003	A.8.13 Information Backup	Recover (RC)	RC.RP-01 (Recovery Plan)	Backups are the technical engine for the "Recover" function.
GR-004	A.6.3 Security Awareness	Protect (PR)	PR.AT-01 (Awareness & Training)	Training creates a human "Protect" layer against social engineering.
GR-005	A.5.24 – Information Security Incident Management Planning and Preparation	Govern (GV)	GV.OC-01 (Organizational Context)	GDPR compliance is a "Governance" and business requirement.
