CISO Assistant - GreenLead Project Summary

Prepared by Cameron Naidoo

Project overview

- To map GreenLeaf E-Commerce's identified risks to ISO27001:2022 controls and generate a compliance assessment report

Tools Use

- CISO Assistant (Cloud Trial)
- ISO 27001:2022 framework

Key Steps

1. Create a domain and perimeter for GreenLeaf E-Commerce
2. Imported the ISO 27001:2022 framework
3. Created a compliance assessment baseline
4. Mapped risks (GR-001 - GR-005) to specific Annex A Controls
5. Generated a formal compliance report

Outcomes

- A PDF report showing GreenLeaf's Compliance status against ISO 27001
- A dashboard visualising risk distribution and control status.

Skills demonstrated

- GRC tool implementation
- Risk-to-Control mapping
- Compliance reporting
- Dashboard Visualisation

Next Steps:

1. Upload evidence request to CISO Assistant for each mapped control
2. Update risk score based on remediation progress
3. Schedule a follow up assessment after controls are implemented
